Chains deployed

Financial Institutions

- Tokenized assets and securities issuance
- Interbank settlement networks
- Stablecoin and CBDC systems

Governments

- Digital identity systems
- Public procurement

Manufacturing enterprises

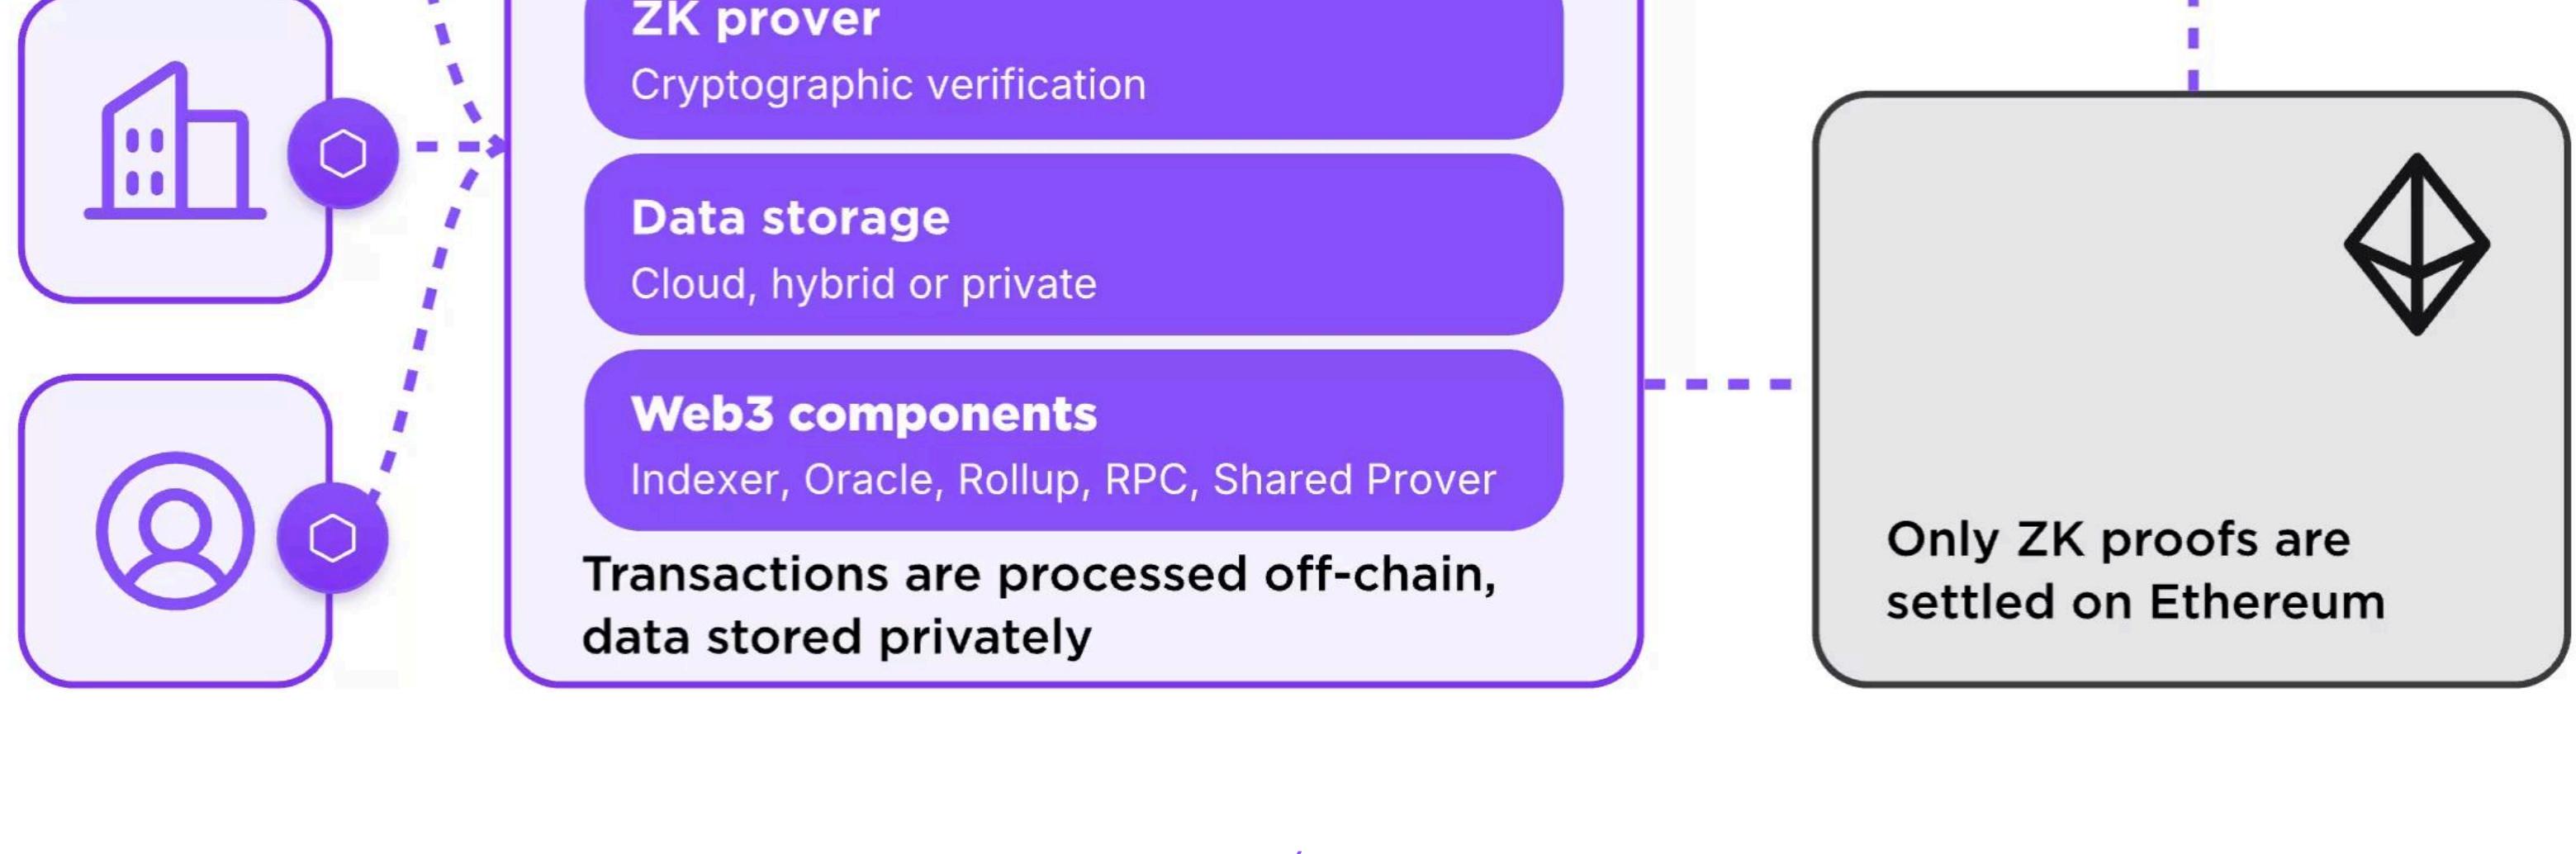

- Product provenance & traceability
- Compliance automation

Healthcare

- Pharmaceutical supply chain
- Patient data sharing networks
- Healthcare licensing

Enterprise-grade architecture, proven in production

CDK Enterprise enables throughput comparable to Visa, delivering unmatched scalability at minimal cost.

Fully Customizable

Customize your chain to fit your project – from block time to integrations

Fully Managed, 24/7

Uninterrupted operations around-the-clock with enterprise-grade SLA support

Feature-Rich & Extensible

Expand functionality with Gateway's AppKits and trusted integrations

Privacy Engineered for Enterprises

Public permissioned, not siloed

Stay connected to the broader Ethereum ecosystem while maintaining full privacy for your network.

Fine-grained access control for Internal users

- Unified IAM for humans, AI agents, and IoT devices powered by decentralized identity
- Immutable audit trail of permission updates and access attempts
- Seamless integration with existing enterprise identity systems including Microsoft Entra and AWS IAM

Compliance built in every block

Data Sovereignty and Control

Control where and how your data is stored to meet data residency and governance requirements.

GDPR Compliance by Design

Store transactional data in your own databases for GDPR compliance and manage identities off-chain with DIDs.

KYC Out-of-the-Box

Onboard users compliantly and privately with Billions' identity and KYC solution, trusted by over 2 million verified users.

Transparent Auditing

Provide authorized auditors and regulators with secure, role-based access to verifiable activity logs.

Seamless migration from Hyperledger

Migrate to CDK Enterprise with zero downtime and full transaction history preserved – just as we successfully did for Palm Network.
